

## Press Release

### **IVECO BUS and ChargePoint signed a partnership agreement to propose a best-in-class Fleet Management offer**

Vénissieux, 19th September 2023

IVECO BUS, a European leader in sustainable mobility with its innovative solutions for passenger transport, and ChargePoint have signed an agreement allowing IVECO BUS to offer ChargePoint's fleet software portfolio to its European customer base.

The combined expertise of the two companies will support transport operators in their transition to electromobility providing a best-in-class offering to operate their fleet and charging infrastructure.

This solution will make available to operators' data on the status of their vehicles, batteries and charging infrastructure, enabling them to optimize the management of their fleet. This will allow for proactive monitoring for charge management, range forecasting, streamlined delivery route and schedule planning - simplifying the management of vehicle operations.

A smart charging management feature and a depot management tool linked to the bus operating schedule are also available. These services will allow for optimal management of the energy available for charging, with consequent costs reduction for the operator.

This new service extends the IVECO BUS offering of **IVECO ON** connected services. The individual modules are available for purchase directly from IVECO BUS and can be activated on the **IVECO ON** portal. This new offer allows IVECO BUS to provide its customers with an in-house agnostic solution with new and extended functionalities, strengthening its position as a specialist in complete electric mobility solutions.

*"The partnership between IVECO BUS and ChargePoint is very good news for our customers. We can now offer, in an integrated way, fleet management from the IVECO BUS vehicles data and the charging stations, in addition to smart charging and depot management. In this way, bus depots can be managed via a single tool, which is in line with the IVECO BUS strategy to provide turn-key solutions."*, said Marco Franza, Head of Energy Management Solutions, Iveco Group.

*"The move to zero emission fleets is accelerating rapidly across Europe, as fleet managers embrace electrification to deliver a lower total cost of ownership"* said André ten Bloemendal, Senior Vice President Europe, at ChargePoint. *"Rolling out our*

*cloud-based fleet management solution with bus OEM leader IVECO BUS demonstrates our shared commitment to fleet electrification in Europe, and together delivers integrated solutions for fleets as they shift to electric vehicles.”*

**About ChargePoint Network (Netherlands) B.V**

ChargePoint is creating a new fueling network to move people and goods on electricity. Since 2007, ChargePoint has been committed to making it easy for businesses and drivers to go electric with one of the largest EV charging networks and a comprehensive portfolio of charging solutions. The ChargePoint cloud subscription platform and software-defined charging hardware are designed to include options for every charging scenario from home and multifamily to workplace, parking, hospitality, retail and transport fleets of all types. Today, one ChargePoint account provides access to hundreds-of-thousands of places to charge in North America and Europe. For more information, visit the ChargePoint pressroom, the ChargePoint Investor Relations site, or contact the ChargePoint North American or European press offices or Investor Relations.
